1PXFED**NEW****One Way Surface Mount Intercom Kit With Keypad****Simple 2 wire connection to intercom****Robust aluminium surface mount door station****Backlit in green****Free contacts or 13V AC lock release****Stylish Italian design****2 relays**

1PXFED INSTALLATION

The 1PXFED kit from Farfisa provides an elegant and simple to install solution for 1 way audio installations where an access control keypad is required. Thanks to the use of 1+1 technology only 2 conductors are needed to connect the stylish yet durable Exhito internal intercom to the Profilo surface mounted door station. The Profilo series benefits from a robust aluminium construction with stainless steel button and subtle green back lighting of the nameplate and keypad.

The system can provide either a 13V AC output for a traditional lock release or free contact switching to activate other types of lock or electric gates.

Kit contains; PL11PED, FC52PL, PL92, PRS210ED & EX321

*External unit dimensions: 118x265x80
Internal unit dimensions: 270x44x47*
